

W.GTSQI15

I-SERIES

The Woodson salamander utilises top heat only and is perfect for grilling, browning and gratinating.

Features

- Unique high speed infrared glass elements with increased strength and durability providing long lasting reliability
- Exceptionally even heat distribution for consistent cooking results
- Energy saving top element only operation
- Automatic element operation - saving time and energy. Simply move the tray back from the inserted position to deactivate elements or utilise the built in timer
- Instantaneous heat up means you only switch your Salamander on when you need it
- New multiple position slides and rack for easier and safer loading and unloading
- Extra large 130mm opening
- Easy-to-clean removable crumb tray
- Fast recovery 3500 watt element
