

INTRODUCTION

Tomkin is an established brand, and a hospitality market leader. We offer a broad range of glassware that is timeless, iconic and innovative. In this catalogue you will find a selection of modern, classic, casual and elegant designs to suit the latest trends in food and dining presentation. In addition to this our broad range includes polycarbonate and melamine drinkware to suit both indoor and outdoor environments. Key descriptors are included on each page to identify and highlight the properties of each glass. This guide will help you to select the products that best suit your needs. Please visit our website or contact our dedicated sales team to answer further queries. Contact details for each state are listed on the back page of this catalogue.

CRYSTAL GLASS

Crystal glass delivers exceptional clarity and break resistance. It is perfect for use in dishwashers whilst still capable of preserving its original aesthetic characteristics. It is particularly suited to those seeking an elegant product for the table.

TOUGHENED

Toughened, also known as Tempered glass, rapidly and safely moves from hot to cold temperatures. The molecular construction of the glass also prevents it from breaking into large shards of glass, if it does break due to strong shock it will break into many small pieces avoiding the risk of being cut.

PULLED STEM

A pulled stem is obtained from a single piece of glass and guarantees increased durability. A seamless transition from bowl to stem allows for even glass distribution and thin walls throughout the glass.

REDUCED THICKNESS

Reduced thickness is applied to ensure optimum glass distribution throughout the body, the laser-cutting process used to achieve reduced thickness also guarantees an especially fine lip on the glass.

STACKABLE

The design, construction and durability of this glass allows for stackability. A well-balanced stackable glass reduces the risk of breakage by allowing users to stack glasses on shelves and transport with ease across service areas.

STAR GLASS

Star Glass offers an exclusive chemical composition that delivers an ultra-clear and ultra-pure lead-free glass that is completely recyclable. The limited presence of impurities and colour shades makes Star Glass lighter than crystal but comparable in terms of clarity.

XLT TECHNOLOGY

XLT technology is designed to reinforce stem resistance against the most frequent causes of breakage such as washing, twisting and daily use. XLT is an invisible shield that protects the stem from abrasions, prolonging its useful life even after many washing cycles.

TOMKIN DRINKWARE BRANDS

Bormioli Rocco, Italy's largest glass manufacturer dates back centuries and is today one of the world's leading suppliers of glassware and tableware. Consumers today recognise Bormioli Rocco for quality and design and of their Italian heritage. Whether you are looking for stemware, tumblers, storage containers, decanters, dessert, tea, coffee or preserving, whatever you require there is sure to be something in the extensive range. Today, Bormioli Rocco services Hospitality demands with ranges designed to be both beautiful and durable.

Since 1889, Stölzle's dedication to understanding and refining the process of producing high quality glassware has resulted in a superior collection recognised by leading hotels, restaurants and professional wine connoisseurs. Specialists in producing machine pulled stems, Stölzle consistently achieves a seamless transition from bowl to stem, even glass distribution and thin walls throughout the glass. Representing refined quality Stölzle's crystalline, lead-free, and highly break resistant construction delivers a professional design of exceptional purity, optimal performance and an appreciation of every beverage in its relevant glass. Functional and stylish, Stölzle's comprehensive selection of glassware shapes and sizes offer a style to match and compliment any hospitality environment.

Tablekraft offers a range of drinkware made from premium grade polycarbonate and HACCP food safety accredited premium grade melamine. The tablekraft polycarbonate range is designed and produced to withstand breakages, scratches and discolouration. It has the appearance of glass, and is compliant with Australian food safety regulations and new licensing requirements for late night venues. Additional processes are used when manufacturing the melamine range to deliver a high lustrous look of porcelain, additional scratch resistance and increased durability. Melamine can withstand temperatures up to 110°C and is dishwasher safe. Additional testing is also done on colour pigments to ensure that they do not fade easily, making them the perfect choice for outdoor fine dining, catering, nursing homes, barbecues, airports, hospitals, hotels and canteens.

Duralex glass is made from an industrial patent for moulded, tempered glass, developed in 1936. This industrial process gives the glass a perfect transparency and lasting clarity, and makes it practically unbreakable. The tempering operation consists of a brutal cooling by ventilation of cold air over the two faces of the glass, which has been brought beforehand to a temperature of 700°C. This treatment creates a force in the glass which improves most of its physical properties: resistance to mechanical duress (bending, shocks and impacts) and to thermal shocks of 130°C. The Duralex range at Tomkin consists of glasses and tumblers, plates and dishes.

VIVA HACCP accredited drinkware is the highest quality commercial grade polycarbonate drinkware available in Australia. Each item is cleverly designed and produced to withstand breakages, scratches and discolouration, all whilst maintaining a crystal-like finish, modern and realistic appearance. Bars, nightclubs and drinking establishments are finally making the switch to polycarbonate due to cost benefits (dramatic reduction in glass breakages and costs associated with replacement), labour savings (less staff time dedicated to clean up of glass breakages), safety benefits (safer drinking environment for staff and customers) and quality benefits (the clarity and appearance of polycarbonate is maintained for years). Viva Drinkware is manufactured in Hong Kong.

QUATTRO STAGIONI

Designed for home made preserves with industrial processing criteria, Quattro Stagioni combines the traditional qualities of preserving in glass with the safety features and guarantees of modern vacuum sealing. The sealing gasket in the lid allows air/gas to escape while at the same time preventing water form entering during the preserving process.

Fido is used for traditional preserving in salt, oil, alcohol and vinegar. It features a unique hermetic sealing system using a rubber seal inside the lid and metal clamps which ensure a completely airtight seal. Perfect for dried goods, pickles and chutneys, Fido glass jars are the most practical and environmental storage solution.

TUMBLERS

A range of drinkware made from HACCP food safety accredited premium grade melamine. Additional processes are used when manufacturing the melamine to deliver a high lustrous look of porcelain, additional scratch resistance and increased durability. Melamine can withstand temperatures up to 110°C and is top-shelf dishwasher safe. Additional testing is also done on colour pigments to ensure that it does not fade easily, making it the perfect choice for outdoor fine dining, catering, nursing homes, barbeques, airports, hospitals, hotels and canteens.

For an extensive range of melamine options or to see the full range please contact your Tomkin representative or visit www.tomkin.com.au
